

# POSICON 2012

14<sup>th</sup> January 2012, Pune

Registration begins 7.30 am

## Guest Lectures

1. The incongruous hip in adolescents & FAI- causes and management
2. The infected and destroyed hip Reconstruction options
3. The stiff hip can we regain motion?

	08.00 - 09.00
Dr MS Kocher	08.00 - 08.20
Dr A Johari	08.20 - 08.40
Dr S Parikh	08.40 - 09.00

## Symposium: Paediatric tumors (Session Sponsor Sushrut Surgicals)

1. Reading the radiograph
2. Biopsy- When & How
3. Benign bony lesions - Management
4. Principles of treating malignant bone tumours

	09.00- 10.00
Dr B Jhankaria	09.00 - 09.15
Dr. Y Panchwagh	09.15 - 09.30
Dr. M Agarwal	09.30 - 09.45
Dr. A Puri	09.45 - 10.00

## Best Paper Session (8+4min.)

1. Study of the efficacy of Triphasic Hydroxyapatite silica Bioglass (HASi) ceramic in the treatment of paediatric bone defects
2. Congenital pseudarthrosis of Tibia ..... Can we spare the contralateral Tibia ?
3. Ponsetti technique and CTEV: Overcoming the ground realities in a developing country
4. Evaluation of neglected CTEV managed by Ponseti Technique - A Long term follow up
5. Management of neglected or relapsed club foot deformity on older child by single staged surgery - early results
6. Comparative study on intramedullary titanium elastic nail v/s K-wire fixation in femur shaft fracture in children

	10.00- 12.00
Dr Balakumar, Christian Medical college, Vellore	
Dr V Dutt, Christian Medical College Hospital, Vellore	
Dr. A Kini, Tejasvini Hospital & SSIOT, Mangalore	
Dr A. Singh, C. S. M. Medical University, Lucknow, UP	
Dr. V Shingade, Children Orthopaedic Care Institute, Nagpur	
Dr. T Anand, ERA's Lucknow Medical College, Lucknow	

7. Limb Salvage in Fibular Hemimelia : Overview of 29 cases
8. A quantitative measure of the sphericity of the femoral head as an outcome measure of treatment of perthes' disease
9. Assessment of clinical outcome of percutaneous needle rectus/quadriceps tenotomy in treatment of congenital knee dislocation
- 10.Surgical management of Sprengel shoulder using modified Woodward procedure a case series

Dr R Negandhi P G Institute of Swasthoyog Pratisthan,Miraj

II

Dr ND Siddesh, Kasturba Medical College, Manipal

Dr A Shyam, Sancheti Institute, Pune

Dr S Gugale, Sancheti Institute,Pune

### The POSI Oration:

### Acute Compartment Syndromes in Children: Diagnosis and Treatment

Dr S Mubarak

12.00-12.30

### Lunch

12.30-01.15

### Interactive case discussions Session I

Dr. B Joseph

01.15-02.15

### Guest Lectures (Session Sponsor Wanbury Osteolife)

02.15-03.00

Nuclear medicine are we ignoring this investigation?

Dr S Solav

Renal Rickets are we missing the diagnosis and management

Dr V Khadilkar

Juvenile rheumatoid arthritis pitfalls in diagnosis & management

Dr R Khubchandani

### Free papers Session 1 ( 5+2min)

03.00-04.00

1 Antibiotic prophylaxis to prevent surgical site infection in AIS patients undergoing posterior spinal fusion - 2 doses Vs antibiotics till drain removal.

Dr V Kamath CMC hospital Vellore & DKCH Hong Kong

2 Study of optimal time of closure of triradiate cartilage in children with neuromuscular affection

Dr R Negandhi, Duchess of Kent Children's hospital

3 Volume changes of the femoral head and the acetabulum in Perthes' disease- evidence of a femoro-acetabular growth dissociation?

Dr L Meiss, Medical Center Hamburg-Eppendorf

4 Prospective Randomized Controlled Trial Comparing the Outcome of Titanium Elastic Nailing with Stainless Steel Nailing in the Management of Pediatric Diaphyseal Femur Fractures

Dr. R Maharjan, BP Koirala Institute of Health Sciences, Nepal

III

5 Community-associated, Methicillin-susceptible and Methicillin-resistant Staphylococcus aureus Bone and Joint Infections in Children: Experience from South India

Dr A Kini, Tejasvini Hospital & SSIOT, Mangalore.

6 Hip reconstruction in children with cerebral palsy: outcomes and the role of open reduction.

Dr A Kothari, Nuffield Orthopaedic Centre Oxford

7 Efficacy of Stem Cell Therapy in Hypoxic Brain Damage leading to cerebral palsy  
Results : Study of 25 cases

Dr A Bagul, Chaitanya Hospital Parvati, Pune

8 Results of Pollicisation of Camptodactylous Index Fingers In Radial Club Hand  
- A Functional Analysis Of Seventeen Patients

Dr M Agashe , Wadia Hospital for children

## Debates

04.00-05.15

For: 8 min; Against: 8 min ; 4 min discussion; 5 min sum up

1 “There is no role for amputation in fibular hemimelia”

Dr Vrisha (agree)/Dr Sanjeev (disagree)

2 “The spica cast for paediatric femoral fractures is a relic of the past”

Dr John (agree)/Dr Kaye (disagree)

3 “Growing rods in early scoliosis are not really doing the job”

Dr Sriram (agree)/Dr Song(disagree)

## Paediatric Orthopaedic Quiz

Dr Atul Bhaskar/ Dr Vijay Sriram

05.15-05.30

## General Body Meeting

6 Pm Onwards

**GALA BANQUET ORCHESTRA BY DOCTORS (LETS ACT) FOLLOWED BY COCKTAILS AND DINNER**

08.00-11.00

**Guest Lectures** (Session Sponsor Achlasta - Novartis)

1. Congenital Pseudarthrosis Tibia are we anywhere near a solution?	Dr K Song	08.00 -09.00
2. Osteogenesis imperfecta what are the pitfalls?	Dr B Joseph	08.20 -08.40
3. Clubfoot what are limitations of the Ponseti method?	Dr A Aroojis	08.40 -09.00

**Free Papers Session II (5+2min)**

09.00-10.30

1. Acetabulotrochanteric distance in slipped capital femoral epiphysis	Dr. K Ramnani	
2. Clinical outcome of Shoulder muscle transfer for shoulder deformities in obstetric brachial plexus palsy: A study of 150 cases	Dr M Agashe Bai Jerbai Wadia hospital for Children,Mumbai	
3. Fracture neck of femur in osteogenesis imperfecta - A report of 5 Hips and literature review	Dr TO Michael The Duchess of Kent Children's Hospital ,HongKong	
4. Growth modulation by 8- plate in congenital absence of fibula	Dr S Das, SV Nirtar cuttack, Orissa	
5. Reconstruction of Post Osteomyelitic Bone Defects using Non-vascularised Fibula Graft Retrospective study in 26 children	Dr H Agrawat, Sancheti Institute ,Pune	
6. Club Foot correction by JESS: Experience of 20 cases	Dr A Bishnoi SMS Medical College & Hospital, Jaipur	
7. Is prone position ideal for manipulation & pinning of displaced supracondylar fracture of humerus? Results of a randomized controlled trial comparing manipulation and pinning in supine versus prone positions	Dr B Gopalan, Ganga hospital , Coimbatore	

8. Secondary deformation of shoulder joint in Obstetric brachial plexus palsy :  
discovering the paradox

Dr R Mehta Bai Jerbai Wadia Hospital for children, Mumbai

9. Early limb lengthening is safe in congenital postero-medial bowing of TIBIA

Dr M Chaudhary Centre for Ilizarov Techniques ,Chaudhary Hospital, Akola

10. Congenital knee dislocation- our protocols

Dr B Sarma Sri Sathya Sai inst. of higher medical sciences, Puttaparthi, A.P.

11 Bone and joint tuberculosis in children- An 8 year review

Dr Thomas P Christian Medical college, Vellore

12 Congenital pseudarthrosis of the clavicle

Dr L Erica Ortho & Pediatric Department, Cantonal Hospital, Switzerland

## Case Based Discussion on Obstetric Brachial Plexus Palsy

10.30-11.30

"Approach to Evaluation and Decision Making for OBPP lesions"

1. Newborn OBPP upto 6 mths of age

Dr A Bhatia

2. 6 Months to 3 yrs early shoulder problems

Dr A Muset

3. Role of Botox and muscle transfers , results

Dr R Mehta

Late untreated shoulder problems - salvage options:

1. Glenoid osteotomies

Dr A Muset

2. Humeral osteotomy

Dr A Bhatia

## Interactive case discussions Session II Dr T Nagda

11.30-12.30

## Common techniques you can use and practice

12.30-01.30

- |  |                  |
|--|------------------|
| 1. Percutaneous pinning of a supracondylar fracture of the humerus               | Dr Sabharwal     |
| 2. The Ponseti technique of manipulation and casting for CTEV                    | Dr Bar On        |
| 3. Examination under anaesthesia, CR, arthrography and spica application for DDH | Dr Mubarak       |
| 4. Varus derotation osteotomy for Perthes disease                                | Dr H Shah        |
| 5. TENS for femoral fractures  | Dr Unninarayanan |
| 6. Percutaneous screw fixation of SCFE   | Dr Schwend       |

Lunch ☺

01.30-02.00

## POSICON ENDS

Delegates for advanced workshop on “Early onset Scoliosis and chest wall Deformities” should stay back.
